# V15 Rapide

Cruise Craft clinker-built fibreglass power craft have been built for over 25 years by a group of professional boatbuilders who are also powerboat enthusiasts. Over the years, Cruise Craft designs have been continually modified to keep abreast of the latest technical developments world-wide, and to cater for the changing needs of boatowners throughout Australia.

Our 1972 designs, built in the modern works shown here, are of a high-sided and 'beamy' hull configuration in order to give our craft excellent stability and safety. Many prospective boatowners are family men, who can well do without a boat that is tricky to handle. And for them Cruise Craft designs are ideally suited. But in our designs we have remembered the needs of owners such as skiing enthusiasts whose primary interest lies in speed and manoeuvrability.

Little need be said about Cruise Craft constructional quality and durability — these are well known by boatowners countrywide. We welcome the opportunity of letting you see the outstanding 1972 range of Cruise Craft powerboats at our works or at your nearest Cruise Craft distributor.
