

The Cruise Craft Cobra 1500.

Quality is never an accident.
It is the result of intelligent effort.

When Nichols Bros. face the drawing board they do so with certain goals in mind.

A Nichols Bros. boat must be affordable.

A Cruise Craft is a quality craft. It must be economical, it must perform. A Cruise Craft must be stylish, comfortable and practical.

These are the disciplines that have bred the Cobra 1500 Runabout.

Designed for mid-range outboards (35 H.P. - 75 H.P.), styled for easy maintenance and practical for family, fishing or skiing. Anchors and ropes can be stored in the separate foredeck locker, safety gear and other necessities in the shelf under the foredeck. Padded back to back seats add to the comfort and a deep freeboard for extra safety.
