

# Cruise Craft

## PRESIDENT 800

### Full-size Comfort in a Compact Cruiser

Unequalled comfort and luxury abound the President 800 - a swift sturdy masterpiece of skilful engineering. The unique deck and superstructure arrangements provide a maximum amount of living space in a minimum amount of boat length.

This innovative design, like all Cruise\*Crafts, incorporates superb craftsmanship, the best materials available and traditional Cruise\*Craft reliability.

#### Panoramic Elegance

Territorial views and luxurious appointments convey a feeling of sublime spaciousness.

#### Spacious Living

The roomy interior includes a forward V berth, midship berth and a convertible dinette to allow for up to six to sleep in comfort.

#### Forward Head

The large fully enclosed head, with vanity sink, pressurised hot and cold shower is ingeniously located in the forward cabin area.

#### Meal Time Mastery

Dinners or midday snacks are equally suited to the capabilities of this completely equipped galley.

Expansive counter space and a variety of options will please any chef, and because the galley is in the saloon where the action is, there's no feeling of isolation.

#### Smooth, Effortless Power

Inside the spacious, uncluttered engine room, there can be a hearty Diesel Stern Drive or a mercruiser petrol Stern Drive Power Unit.

A Nichols Bros. Boat. Craftsmanship since 1946.
