REC. H.P.	40-125 H.P.

SPACE-AGE BOATING WITH RENEGADE

BEST described as a 'Big' 14-footer, the RENEGADE has been designed with an eye to unfaltering seaworthiness, with peaked out performance in both rough and smooth waters.

By virtue of her size, she can handle any long shaft motor in the 40 to 125 H.P. range.

The dynamic clinker-sided construction, well known in the "CRUISE-CRAFT" manufacture has been used together with an uncluttered deck, which has a large hinged hatch and heavy duty, sporty Vee-ed windscreen.
