ROVER 219

More than anything else, the CruiseCraft story is a value story. CruiseCraft's Rover 219 offers as standard equipment, a list of accessories that on most other boats are extra-cost options. This means more boat per dollar—more size—more seaworthiness: The finest construction materials and techniques and, by far, the most pleasing interiors offered by any manufacturer.

CruiseCraft also means Craftsmanship! Old-time skills, together with modern techniques, combine to make today's CruiseCraft.

They are renowned for their high Freeboard Hull Design, excellent performance and comfortable ride! Now you can be the envy of your friends when you cruise to the islands or your favourite fishing spot.
