

OUTSIDER 510 PRO-AM

Cruise Craft

With our fantastic new Outsider 510, we have further increased Cruise Craft's family of fishing boats. Purpose built for the dedicated nearshore angler, the Outsider 510 has all the features of the bigger Outsider/Pro-Am 580 series, but in a smaller, and more affordable package.

A soft, stable and dry ride, hallmarks of the Cruise Craft boat range, coupled with plenty of cockpit space and ample internal and external freeboard, make the Outsider 510 a safe, seaworthy fishing craft.

It's ideal for the fishing/boating family coming up from a small forward steer alloy tinnie, or GRP half cabin. It's also great for the angler looking for a top sportfishing rig, but who doesn't always have the crew to handle the launch and retrieve of a big boat. The Outsider 510 is easily handled 'one up' on the launch ramp, is small enough to be safely towed behind a six cylinder family car, yet is big enough to safely forage several miles offshore

Standard Fittings
