

RESORT SERIES

6 • 55 • 5

The CruiseCraft range of Resort bow riders is the absolute epitome of excellence, both in Australia and overseas. Countless proud Aussie families have come to appreciate the interior space and exceptional design features offered across all four Resort models.

Owning a CruiseCraft Resort stamps you as appreciating refinement in design, style and performance. A Resort is the on-water counterpart of a top European luxury car - plush, comfortable and a delight to drive.

The entire range of Resort bow riders will excite your senses and delight your family. The fit out and appointments ooze quality. The Resort is the absolute embodiment of safety performance and comfort.

RESORT 6 STERNDRIVE

Offering a balanced blend of space that only a big bow rider can offer, the Resort 6 sterndrive also delivers big buckets of V8 power. With a powerful MerCruiser sterndrive engine slotted in under the padded rear sundeck, this Resort 6 has the get up and go, to get places in a hurry.

The sterndrive configuration delivers a cockpit layout that makes exceptional use of every square centimeter of the boat from the rear boarding platform, all the way through to the apex of the bow rider.

Plush upholstery in the generous full-width rear lounge, stately bucket pedestal seats and the bow rider area itself, set this boat apart from local and imported competitors.

On the water you will appreciate this model as a big performer, a sensational head turner!

The high sided hull makes this an exceptional open water boat, one that can power about on sloppy bays and open lakes without taking any water over the side. This is a safe, high-sided family boat that provides you with total peace of mind with young boaties on board.

Complete in virtually every regard for memorable family days on the water, the rig can be optioned up with just a handful of added features.

Get set to impress; hang on for the ride of your life.
